

# How to Build Your iPad Mount

To build a complete mounting system add cradle/dock (Step 1) and mount (Step 2).

(Step 1 - Select iPad Model) The resulting cradle/dock will attach directly to the mount (Step 2).

(Step 2 - Select Mount) The mount connects directly to the cradle/dock and serves as a mounting point for many applications.

Note: Most solutions require only two parts, cradle/dock for a complete mount. For No-Drill™ Solutions, three parts will need to be added for a complete mount: one cradle/dock (Step 1) and two mounting components (Step 2).

## Example 1: No-Drill™ Mounting Solutions

3 Parts = Complete Mount

## Example 2: All Other Mounting Solutions

2 Parts = Complete Mount
