

How to Build Your Tablet Mount

To build a complete mounting system add cradle (Step 1) and mount (Step 2).

[Step 1 - Select Device] The resulting cradle will attach directly to the mount (Step 2).

[Step 2 - Select Mount Type] The mount connects directly to the cradle and serves as a mounting point for many applications.

Note: Most solutions require only two parts for a complete mount. For No-Drill™ Solutions, three parts will need to be added for a complete mount: one cradle (Step 1) and two mounting components (Step 2).

Select: The select box must be checked for Step 1 and Step 2 to complete your mount. Parts may be ordered individually.

Example 1: No-Drill™ Mounting Solutions 3 Parts = Complete Mount

Example 2: Flat Surface Mounting Solutions 2 Parts = Complete Mount
